

**Installer:** This label is only to be removed by the customer.  
**Homeowner:** Please carefully peel off this label and keep for future reference, such as inside a closet door, etc.

**THIS PRODUCT COMPLIES WITH ANSI Z124.1**

### **Care and Maintenance**

DO NOT USE ABRASIVE CLEANERS TO CLEAN THE TUB. They may scratch or mar the surface. Only use liquid soap or cleaners intended for acrylic fiberglass bathtubs. DO NOT use a wire brush or metal tools or scrapers to remove paint drips, plaster, tar, etc. If a scraping device is needed, carefully use a wood edge.

**WARNING:** Any service or maintenance other than described within these instructions or authorized in writing by Gruber Systems, Inc. or a qualified technician may cause damage to the bathtub and void the warranty.

- Never use hard abrasive cleaners
- Do not use paint thinner, acetone (nail polish remover), nail polish, gasoline, pine oil, etc. as these can cause discoloration and cracking. Isopropyl alcohol may be used to remove grease, paint or some glue from stickers. Always use a clean soft cloth.
- Automotive wax or rubbing compound can be used to remove light surface scratches by lightly buffing them out by hand.
- If you are not sure, try the product on a small test area that is not conspicuous and let it stand for 24 hours to verify that no cracks or discoloration appear.
- Use common household cleaners such as Lysol® Basin™ or mild dishwashing detergent to clean your bathtub and keep it fresh and looking 'new'.

**WARNING:** For bathtubs with whirlpool units installed, the system should be flushed periodically (approx. every 3 months). As a minimum, the tub should be filled with water and ½ cup household bleach. Run the system for approx. 10 minutes and then drain the tub.

If the bathtub is equipped with a whirlpool system, please read the owner's manual of the whirlpool system for specific care and cleaning methods.
