

Solure™ Grab Bars

Quality bathers appreciate.

Finished Kitchen and Bath Products
FROM GRUBER SYSTEMS

Solure Grab bars are the sensible solution for all bathers, but particularly for the elderly, the injured, or the disabled – to help avoid accidental slippage and potential injury during bathing. Grab bars provide a feeling of security, and are a welcome addition that many bathers appreciate.

These grab bars are ideal for home, hotel/motel, hospital or spa installations, and add safety and security to all bathers.

These quality grab bars are available in a variety of materials and finishes, including acrylic white, bone and plated ABS plastic finishes (chrome or brushed nickel) – to match most bathtub trim/faucetry decor.

Solure grab bars are 6 inches long, and designed for insert anchor installation for easy installation in any installed tub or shower. Simply remove the set screws and the old handle can be pulled off and a new handle can be pressed on. This is a great advantage if a customer would like to upgrade from white to chrome or nickel finishes.
